

A Sony Home Cinema Projector 2025 is shown in a modern living room. The projector is mounted on the ceiling, casting a bright beam of light onto the wall. The room features a large, curved sofa, a low coffee table, and a large screen displaying a vibrant sunset scene over a pier. The room is dimly lit, with warm ambient lighting from the projector and wall sconces. The Sony logo is visible in the top left corner of the image.

SONY

CINEMA IS COMING HOME

Home Cinema Projector 2025

A wide-angle night photograph of a coastal landscape. The sky is filled with a dense field of stars, with the Milky Way galaxy clearly visible as a bright, pinkish-white band of light stretching across the center. Below the sky, a layer of orange and red clouds is illuminated from below, likely by the setting or rising sun. The horizon shows a dark silhouette of land with a few distant lights. In the foreground, a calm body of water reflects the colors of the sky and the lights on the horizon. The overall scene is a high-contrast, high-dynamic-range image showcasing the capabilities of Sony's Pro Cinematic HDR technology.

Picture Quality

Sony's advanced processing delivers an unrivalled HDR cinema experience.

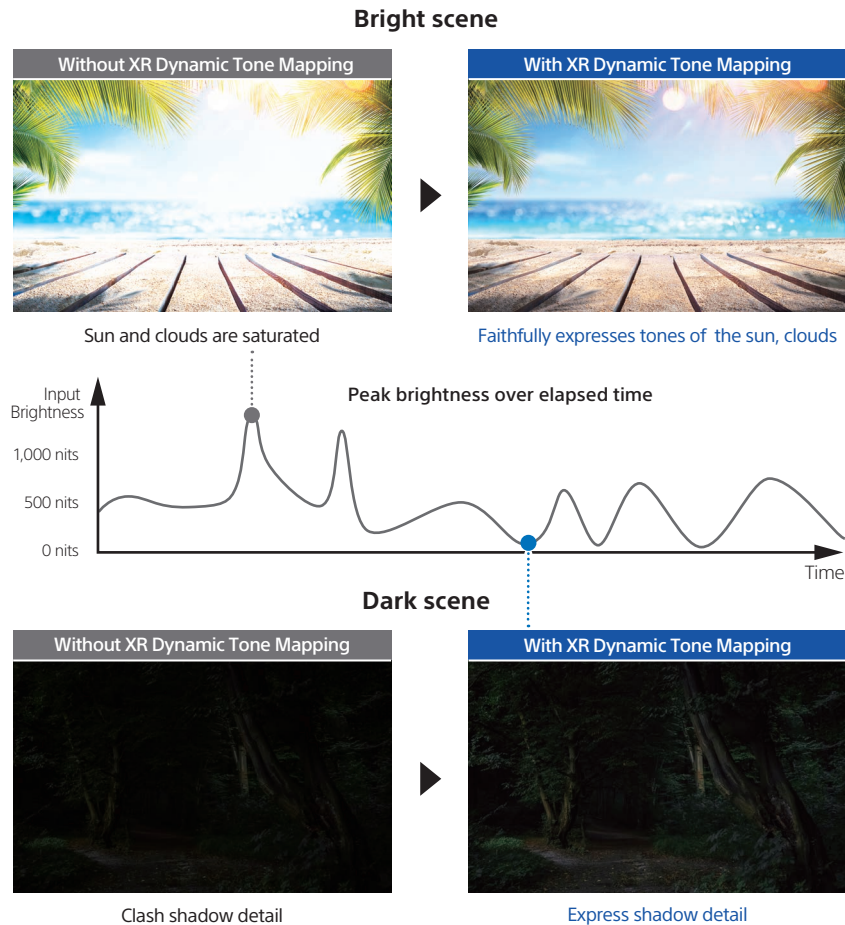

Bring every movie to new life with the ultimate home cinema experience powered by our XR Processor for projector and our class-leading laser light source. Enjoy precision and clarity with rich gradation, deep blacks, and brilliant colors.

XR Processor for Projector

XR Dynamic Tone Mapping

XR Dynamic Tone Mapping optimizes brightness frame by frame, ensuring perfect gradation and contrast while keeping creator's intent.

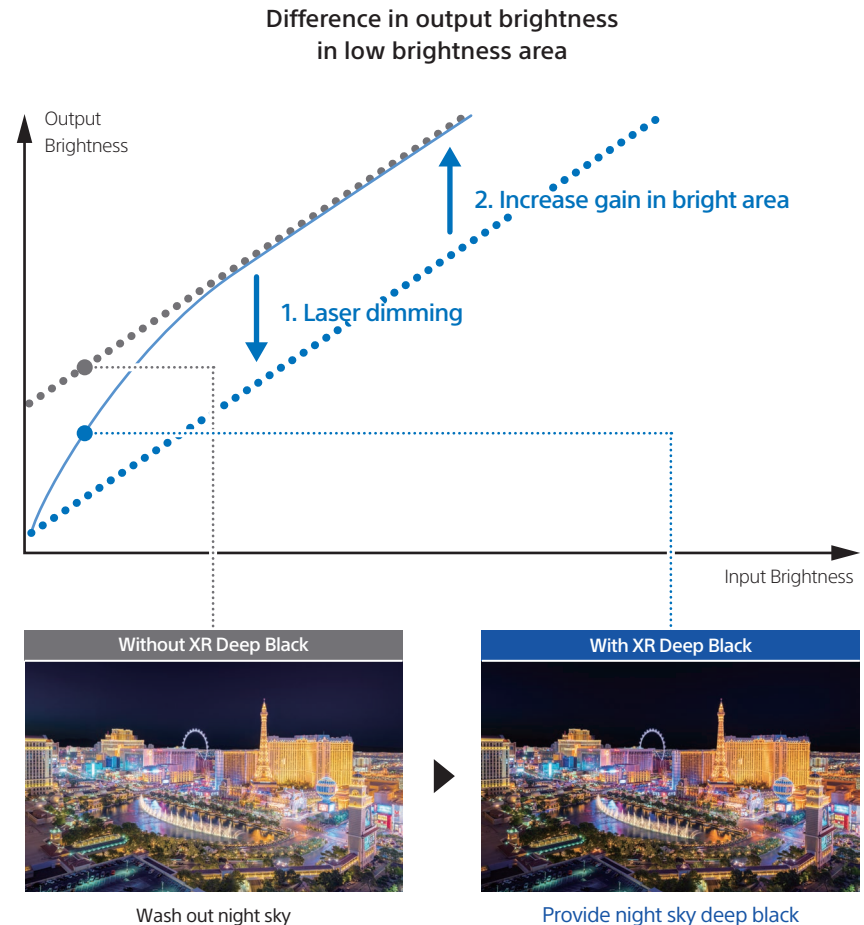

*BRAVIA Projector 8 / BRAVIA Projector 7 only

XR Deep Black

XR Deep Black technology enhances dark scenes with deeper blacks and precise color expression by controlling laser dimming in dark scenes and optimizing highlight processing.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

XR Triluminos Pro

XR Triluminos Pro brings over a billion colors to life.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Without XR Triluminos Pro

With XR Triluminos Pro

Wide color gamut and High brightness

This combined with high brightness and expanded color volume delivers outstanding color expression.

XR Clear Image

XR Clear Image analyzes individual object frame-by-frame and expresses textures close to reality down to the finest detail while minimizing noise.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Best Clarity for individual objects

Focus on the finest details. XR technology hones in on individual details, bringing unparalleled sharpness and precision to every scene.

Without XR Clear image With XR Clear image

Everything upscaled to 4K quality

See everything in crisp 4K quality. XR upscaling technology smartly recreates lost textures and details, transforming every frame to restore the director's vision.

Without XR Clear image With XR Clear image

Beautiful images without noise

Uncompromised clarity. XR's noise reduction technology ensures smooth, distraction-free visuals.

Without XR Clear image With XR Clear image

Background technologies to achieve value

XR Processor for projector optimizes our acclaimed BRAVIA TV video processing for projection.

Cross-Analyzes

Rather than processing various elements such as color, definition, and contrast individually, it analyzes them cross-sectionally to provide more natural-looking images without artificial impressions.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Depth Mapping

It utilizes Human Cognitive technology to enhance depth and texture for immersive experiences. Foreground depth is enhanced and the background adjusted so the entire image looks more real and natural.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Focal Points recognition

The focal point is where you tend to focus in a picture, where your eyes are naturally drawn to within the scene. It recognizes that focal point and enhances that part of the image.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Creator's intent

Sony home cinema projectors also perform consistent picture quality adjustment and signal processing to reproduce the gradation and color which creator's intent.

This is achieved by designing and adjusting the basic picture quality parameters of the projector with the same targets as the industry-standard BVM-HX3110's White Balance/Gamma/Color.

Additionally, our projectors use the XR processor* of the same generation as the current BRAVIA high-end models.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Installation Flexibility

Effortless installation.

Endless possibilities.

With effortless installation, Sony projectors open up endless possibilities.
The compact, lightweight design allows for versatile setup in any space.

Compact and lightweight

Say goodbye to heavy lifting. Weighing in at 14kg and 13kg, our projectors pack a punch without the bulk.

BRAVIA Projector 8

BRAVIA Projector 7 / VPL-XW5000ES

Flexible installation, consistent clarity

Effortlessly adjust your image for geometry, ensuring seamless projection at any ceiling or stand height by using with the lens shift function and corner keystone correction in combination. With XR Clear Image, content can be projected while maintaining as much clarity as possible.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Without Corner keystone correction

Projected as a trapezoid

With Corner keystone correction

Can be adjusted to shape to fit the screen

Default picture setting ideal for cinema

Stunning visuals right out of the box. Sony Home Cinema Projectors are pre-configured for cinematic color and gamma, with extensive adjustment and calibration options available if needed.

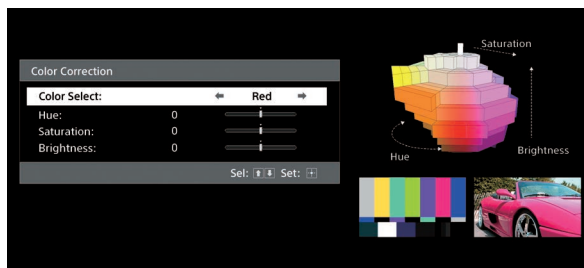

Precision controls for perfect viewing

Explore countless ways to enhance your home cinema experience with customisable settings for color correction, color space, and gamma correction to display images just the way you like them.

Color correction

Precise color correction technology enhances the accuracy of every hue, creating lifelike images with rich tones.

Color space

With a huge 95% DCI-P3 color gamut, and custom color space tuning, all your visuals are more immersive and realistic.

Gamma correction

It configures the response characteristics of gradation of the corrected image.

Usability

Reliability meet usability

Built for reliability and designed for usability, our projectors integrate seamlessly with industry protocols and major solutions.

Reliable operation with standard industry protocols as well as major solution partners

Home Automation Systems

One remote to manage it all. Easily integrate your projector with top home automation systems like Control4, Crestron, Savant, AMX.

Remote diagnostics

Ideal for advanced custom installations, Sony home cinema projectors support remote monitoring and diagnostics of network settings, status, and even temperature.

Picture Position Memory

Easily switch between cinema aspect ratios and TV aspect ratios with the push of a button. Ideal for Cinemascope screens with 5 programmable presets to support a wider range of content aspect ratios.

*GTZ380 / BRAVIA Projector 8 only

Aspect Ratio Scaling

Easily scale 16:9 content to match the height of a Cinemascope screen digitally without needing to adjust the lens.

*BRAVIA Projector 7 only

With 4K/120fps and ALLM (Auto Low Latency Mode) by HDMI2.1, it gives smooth and clear movement for responsive gameplay.

4K/120 fps*1

Experience lightning-fast, smooth visuals in 4K at 120 frames per second. Perfect for action-packed gaming.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

4K/60 fps

4K/120 fps

*1: 4K/120fps compatible games

Auto Low Latency Mode*2

Always game-ready. Automatically switch to game mode with Auto Low Latency Mode, ensuring responsive play and minimal lag.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Auto Low Latency Mode: OFF

Auto Low Latency Mode: ON

BRAVIA Projector 8 / BRAVIA Projector 7

Input lag reduction

21 msec for 4K/60 fps signal

12 msec for 4K/120 fps signal

*2: The Projector automatically switches Input Lag Reduction mode to on based on the ALLM information from the HDMI-connected device. In this mode, Motionflow and NR cannot be used.

Sustainability

Better tech. Better planet

Better tech helps maintain a better planet.

Our projectors are designed with sustainability in mind, featuring mercury-free components and enhanced power efficiency.

Environmentally friendly design

Better tech helps maintain a better planet. Our projectors are designed with sustainability in mind, featuring mercury-free components and enhanced power efficiency.

Power efficiency

Maximize energy efficiency without compromising on picture quality, with XR Deep Black's advanced laser control technology. Save on power, not on quality.

*BRAVIA Projector 8 / BRAVIA Projector 7 only

Conventional model

Power consumption in the dark scene

With XR Deep Black

Power consumption in the dark scene

Mercury-free

Safer and greener. Our projectors use mercury-free laser light sources, designed to be safer for the environment and your home.

Mercury usage

0%

All our projectors use mercury-free laser light sources.

4K Motionflow

The powerful video processor in the projector offers Motionflow for smooth and clear motion, even when viewing 4K content. Motionflow is ideal for fast-moving sports content, as it adds frames to reduce blur while maintaining brightness. Cinema purists can choose True Theatre mode to retain the original 24 fps.

Motionflow: **OFF**

Motionflow: **ON**

Anamorphic lens compatibility for 4K signals (V-stretch for 4K)

Wide lens compatibility means you can use your legacy anamorphic lenses with ease, even with 4K content. Watch your content in your favorite formats with a full-size picture, thanks to the V-stretch function.

Make the home cinema experience bigger and better than ever

Sony 4K projectors are compatible with IMAX Enhanced content, making them ready to deliver the bigger, more breathtaking IMAX visuals you love in compatible content. Take advantage of the size of your projector screen with movies that become even more immersive with IMAX Enhanced.

IMAX
ENHANCED

Native 4K SXRDTM panel.

Immerse yourself in an incredibly lifelike picture with native 4K that offers 8.3 million pixels (3,840 x 2,160). With an 0.61-inch SXRDTM panel, you'll enjoy high brightness, inky blacks, vibrant colors, rich tones and textures, plus clear cinematic motion and image smoothness.

**GTZ380 (4096x2160) with 0.74-inch SXRDTM panel

Wide Dynamic Range Optics

Our Wide Dynamic Range Optics contribute to a compact design with better light control by maximising the potential of the laser light source.

The resulting higher color volume means naturally colorful images, even at high brightness levels, and stunning, immersive contrast.

Advanced crisp focused lens

Experience flawless clarity across the entire screen, thanks to our Advanced Crisp-Focused Lens. The 70-mm aspherical front lens widens the focus area, ensuring clear images from corner to corner. A floating focus system utilises two moving lens groups and extra-low dispersion glass for distortion-free images with accurate color reproduction.

*BRAVIA Projector 8 only

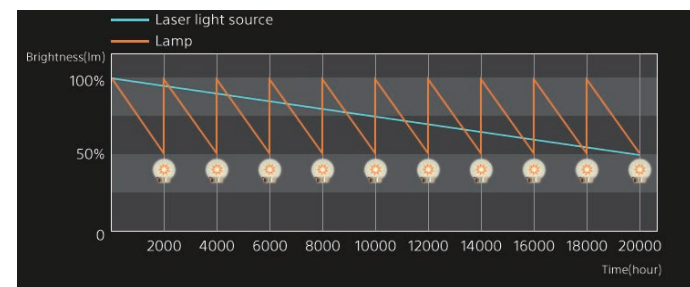

Enduring brightness from a laser light source

You'll never have to worry about changing the lamp in your home cinema projector—no lamp replacement and virtually no maintenance are required.

The projector uses a pure and reliable laser light source, keeping optimal brightness for up to 20,000 uninterrupted hours.*

*Estimated time and it varies depending on environment and usage.

Motorized zoom lens and wide lens shift

Installing your 4K laser projector in any room is easy with a motorized zoom and a wide lens shift range. Adjust the image position vertically and horizontally for the perfect setup whatever your room size.
